Each UIA Member Section is the most representative professional organisation of architects in a given country. These organisations compose the UIA, the only global network of architecture professionals. The UIA Member Sections are grouped geographically according to five regions:
Western Europe
Eastern Europe and the Middle East
America
Asia and Oceania
Africa.
The UIA work programmes are groups of experts working in specialised areas of the architectural profession. They provide the world architectural community with specific, focused information in the following areas:

- Responsible Architecture
- Architecture for a responsible Future
- ARES - Architecture and Renewable Energy Sources
- Architecture and Society
- Architecture and Children
- Architecture for All
- Urbanisation
- Urban Settlements & Disasters
- Intermediate Cities - Urbanisation and Development
- Tourism
- Habitat
- Habitat Action without borders
- Cultural identity
- Heritage
- Spiritual Places
- Facilities
- Educational and Cultural Spaces
- PHG - Public health

GLASGOW 2014 COMMONWEALTH GAMES

UIA SPORTS & LEISURE GROUP SEMINAR & VISITS TO FACILITIES: 15 – 17 MAY 2014

Progress continues in the organisation of a UIA S&L GROUP visit to Glasgow in advance of the 2014 Commonwealth Games. Our seminar will be an integral part of the prestigious annual convention of the Royal Incorporation of Architects in Scotland (RIAS) and is currently programmed by RIAS for Friday morning (not afternoon), 16th May. It will be open to all attendees of the RIAS Convention. Presentations will address the potential impact and legacy of the Glasgow Games and the care that has been taken to minimise the initial capital and lifetime running costs of the sports facilities. They will include

- An overview by Ian McKenzie
- The new Hydro Arena by Fosters Architects
- The Emirates Arena and the Sir Chris Hoy Velodrome
- The temporary conversion of Hampden Park from a famous football stadium into the Athletics Arena for the Games

Visits by coach to key facilities are planned – for our Group only – for Saturday, 17th May, and the intention is to follow the visits with our Group Meeting at Commonwealth House, the HQ of Glasgow 2014, and a Group Dinner at a venue yet to be decided.

This programme suggests that members will need to arrive on or before Thursday 15th May 2014 and leave Glasgow on or later than Sunday 18th May. Later this year, RIAS will confirm the cost of attending the Convention and negotiate discounted rates with nearby good-value hotels. Then we will be able to send members more detailed information on likely costs.

We look forward to seeing you in Glasgow in May 2014.

Ian McKenzie, Geraint John, Bill Stonor
INTERNATIONAL MASTER OF SPORTS ARCHITECTURE 2018

CONCEPT: International Master in Sports Architecture

Working programme with international universities/schools/polytechnics/institutes/federations/clubs in the field on S&L architecture, landscape architecture/urban design and environmental engineering e.g.

OBSERVATION: Role of sport in modern society and the importance to an adequate infrastructure at its disposal; missing of well educated architects specialized in sports architecture

IDEA: To organize postgraduate studies for architects with an university degree and wish to obtain knowledge and specific expertise in the field of sports architecture

To create an international multidisciplinary training, providing the interface between architecture and sports.

TARGET/MARKET: Architects; Planners, Landscape architects, others?

CONTENTS: History of sports architecture
Typologies - Programm
Architecture
Urban and Landscape aspects
Constructions (structures)
Engineering Technic (also sports equipment)
Environmental strategies, Sustainable development,
Project Management
